With many years experience helping making projects come to life across many mediums, I am now looking for consistent part-time work to supplement my current personal and professional endeavors as well as expand my knowledge and community. I enjoy helping in any areas necessary to help a team achieve a shared outcome of win-win situations for everyone involved. I have included relevant experiences and will gladly expand on and/or give references for any of them. I look forward to meeting the 6 of you.

*I see that I do not have extensive recording of word and excel, though I do have those skills.

WORK EXPERIENCE

[Software Engineering Teaching Assistant](#) | BrainStation

— JUNE - SEPT 2023, VANCOUVER, BC (remote)

- Performed code reviews, helped create lesson plans, course delivery coordination between instructors, reported to management, with a main focus on providing emotional and technical support for the 25 students I directly oversaw.
- Tracked all student/instructor interactions, marks, and notes via excel/google sheets.
